

Matching Grout Mix

Grout Joints

Mix/Laying Instructions

As part of the Chelmstone service, matching coloured grout is available as an optional extra.

20kg bags, available in all Chelmstone colours.

This mix is ONLY a 'coloured sand blend'. It does not include cement, which must be added on-site.

Ideal Mix:

3 part 'coloured sand blend'-grout mix

1 part 'off white' cement

Note: When matching to our Slate Grey colour, grey cement needs to be added instead of off white cement.

Coverage:

Paving coverage: 1 bag / 15 sqm (6-10mm joints)

Render coverage: 1 bag / 1 sqm (10mm thick)

Grouting Instructions:

We recommend 6-10mm grout joints. When filling joints all excess materials must be cleaned off immediately. This should be done using a 2-bucket method of clean water and sponges. It is essential that care be taken to remove ALL excess material as you go. If this is not done it may be necessary to get professional cleaners in to remove excess grout.

Large grouting guns can be purchased from the Waterproofing Warehouse Ph: 3272 1404.
